

FT Charge Nurse- 2nd shift

Description

Are you a looking for a new opportunity and love finding moments of joy with those who have Dementia? Arbor Springs is the place for you! We are a 56-bed skilled nursing facility located in West Des Moines and focus solely on the Dementia diagnosis. This position is a FT 2nd shift position. Under general supervision of the Director of Nursing, the Charge Nurse directs the provision of resident care services for a particular shift and/or unit and supervises the nursing staff assigned to that shift, with responsibility and accountability for assuring that quality nursing care and service to facility residents/families, compliance with applicable laws and regulations, and adherence to company policy/procedure occur on that shift. Performs direct nursing services to residents, in accordance with individual plans of care and physicians' orders. Technical assistance, professional guidance, and quality monitoring are provided by administrator, director of nursing, regional consultants, and other nursing professionals on staff.

Responsibilities

- Assumes responsibility for unit/shift staff compliance with rules, regulations, standards of practice and facility policy and procedure; assures that residents receive needed nursing care and services on that shift according to plans of care and physicians' instructions.
- Interpret existing policies and procedures, rules and regulations to nursing assistants, restorative nursing assistants, residents, families, physicians and agency personnel.
- Supervise and evaluate all direct resident care, quality of life issues, and customer service issues and initiate corrective action or recommend disciplinary action to the Director of Nursing as necessary.
- Document resident care provided and resident's response or lack of response to care provided.
- Document daily notes on unstable residents, Medicare residents and recently admitted residents.
- Obtain report from nurse being relieved and record sufficient information to implement appropriate follow-up action as necessary.
- Provide report to nurse coming on duty, including sufficient information for follow-up action as necessary.
- Take appropriate action to assure adequate staffing to meet residents' needs.
- Conduct resident rounds daily, reporting problems to nursing supervisor and initiating corrective action.
- Identify resident problems and emergency situation and initiate emergency care and "life-saving" measures in the absence of a physician.
- Provide supervision to Nursing Assistant providing direct resident care.
- Participate in the employee evaluation process by providing information on the performance of unit/shift staff.
- Administer and document direct resident care, medications, external nutrition and treatments per physicians' orders and accurately record all care provided; administer or approves administration of PRN medications and treatments.
- Perform and document comprehensive assessment of residents, or parts of comprehensive assessments, as assigned and obtain required RN signature for MDS.
- Develop and implement an accurate comprehensive care plan based on
